EDUCATION

Bengal Institute of Technology

Bachelor of technology in Computer Science

Kolkata, India

Aug. 2023 – May 2027

EXPERIENCE

GirlScript Summer of Code

June 2026 – AUG 2026

Open Source Contributor

Remote

- Developed a REST API and PostgreSQL to store data from learning management systems
- Contributed to multiple open-source repositories by fixing bugs, improving documentation
- Collaborated with maintainers and contributors via Git and GitHub Via Discords

PROJECTS

Drape | React, Three.js, Tailwind CSS, Framer Motion, Node.js, Express, CloudflareAI

Live , GitHub | 2026

- Developed a full-stack 3D AI T-Shirt customizer using Three.js and React Three Fiber with real-time interactive 3D preview.
- Integrated Cloudflare Workers AI to generate Images from user prompts via an Express REST API.
- Implemented custom color picker, logo decals, full-shirt texture upload, and canvas-based design download.
- Built a responsive, animated frontend using React, Vite, and Tailwind CSS with smooth transitions (Framer Motion) and global state management (Valtio).

Aivon | React, Tailwind CSS, shadcn/ui, Express, MongoDB, JWT Authentication

Live , GitHub | 2026

- Developed an all-in-one full-stack AI platform integrating chat, text-to-image generation, background removal, and text-to-speech capabilities.
- Built custom animated UI components using shadcn/ui and Motion, including ripple buttons, border-beam effects, and a retro grid hero section.
- Implemented JWT-based authentication for secure user login, token generation, and protected API routes.
- Integrated multiple AI tools including Hugging Face API (chat), Cloudflare Workers AI (image generation), Kokoro AI(Text-to-voice), and Python libraries for background removal.

Chattix | MongoDB, Express.js, React, Node.js, Socket.IO, cloundinary, Jwt Auth

Live , GitHub | 2026

- Developed a real-time chat app using the MERN stack with scalable client-server architecture.
- Implemented JWT-based authentication with bcrypt password hashing and protected API routes.
- Built real-time chat with Socket.IO supporting messaging, online presence, and image sharing.
- Developed RESTful APIs using Express.js and MongoDB to store and retrieve users, conversations, messages, and images, and built a responsive React UI optimized Front End Web for all screen sizes.

FaceApp | React, face-api.js, JavaScript, Canvas API

Live , GitHub | 2026

- Developed a real-time face recognition app using React and face-api.js with detection, landmarks, and expression analysis.
- Implemented webcam streaming with canvas overlays for web design real-time bounding-box detection.
- Optimized model loading and rendering pipeline for low-latency real-time browser performance.
- Implemented cross-browser support for consistent real-time face detection.

TECHNICAL SKILLS

FrontEnd Languages: Java, Python, C/C++, JavaScript, TypeScript, HTML/CSS, SQL(PostgreSQL)

Frameworks: React, Vue.js, Express.js, Next.js, Redux, Tailwind CSS, Node.js, Prisma, Suprabase, Socket.IO, Magic-UI

Database: NoSQL(MongoDB), SQL(Mysql, Postgresql, oracle)

Developer Tools: Git, Docker, Kubernetes, CI/CD, Postman, VS Code, Visual Studio, Replit

Back End: Express.js, Angular.js, Node.js, Danjo, Postman

Problem solving skills: Solve 200+ question on leetcode, gfg
