Open to remote internships · Full Stack / MERN Stack Developer

EDUCATION

Techno Bengal Institute of Technology

Bachelor of technology in Computer Science

Kolkata, India

June 2023 – June 2027

EXPERIENCE

FullStack Developer Intern

May 2026 – Present

Lupira

Remote

- Developed and optimized the responsive frontend of the web application using Typescript, Nextjs, Tailwind css
- Designed database schemas for a user issue and feedback form utilizing Prisma ORM with PostgreSQL.
- Contributed 6K+ lines of code to an established codebase via Git

Open Source Contributor

June 2025 – AUG 2025

GirlScript Summer of Code

Remote

- Developed a REST API and PostgreSQL to store data from learning management systems
- Contributed to multiple open-source repositories by fixing bugs, improving documentation
- Collaborated with maintainers and contributors via Git and GitHub Via Discords

PROJECTS

Aivon | React, Tailwind CSS, shadcn/ui, Express, MongoDB, JWT Authentication

Live , GitHub | 2026

- Built an all-in-one full-stack AI platform integrating 4 AI APIs (Hugging Face, Cloudflare Workers AI, Kokoro AI, Python bgremoval) with JWT-secured routes and a fully animated UI.
- Designed custom animated UI components using shadcn/ui, Motion, and custom CSS.
- Implemented JWT-based authentication for secure user login, token generation, and protected API routes.
- Integrated multiple AI tools including Hugging Face API (chat), Cloudflare Workers AI (image generation), Kokoro AI(Text-to-voice), and Python libraries for background removal.

Chattix | MongoDB, Express.js, React, Node.js, Socket.IO, cloudinary, Jwt Auth

Live , GitHub | 2026

- Developed a real-time chat app using the MERN stack supporting concurrent messaging, online presence tracking, and image sharing across all screen sizes.
- Implemented JWT-based authentication with bcrypt password hashing and protected API routes.
- Built real-time chat with Socket.IO supporting messaging, online presence, and image sharing.
- Developed RESTful APIs using Express.js and MongoDB to store and retrieve users, conversations, messages, and images, and built a responsive React UI optimized for all screen sizes.

Drape | React, Three.js, Tailwind CSS, Framer Motion, Node.js, Express, Cloudflare AI

Live , GitHub | 2026

- Developed a full-stack 3D AI T-shirt customizer with real-time interactive preview using React Three Fiber.
- Integrated Cloudflare Workers AI to generate Images from user prompts via an Express REST API.
- Implemented custom color picker, logo decals, full-shirt texture upload, and canvas-based design download.
- Built a responsive, animated frontend using React, Vite, and Tailwind CSS with smooth transitions (Framer Motion) and global state management (Valtio).

FaceApp | React, face-api.js, JavaScript, Canvas API

Live , GitHub | 2026

- Developed a real-time face recognition app using React and face-api.js with detection, landmarks, and expression analysis.
- Implemented webcam streaming with canvas overlays for real-time bounding-box detection.
- Optimized model loading and rendering pipeline for low-latency real-time browser performance.
- Implemented cross-browser support for consistent real-time face detection.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C++ , Python, Java

Frameworks & Libraries: Next.js, React, Express.js, Tailwind CSS

Databases & BaaS: PostgreSQL, MongoDB, Prisma, Redis, Neon, Supabase

DevOps & Cloud: Docker, CI/CD, Cloudflare, AWS (S3, EC2), Kubernetes

Developer Tools: Git/GitHub, Vercel, npm/pnpm, Postman, VS Code

Problem solving skills: Solved 200+ DSA problems on LeetCode and GeeksForGeeks
